

Important Parent Information:

We have been informed of the safeguarding concerns below and want to draw your attention to them:

- There have been incidents locally of children being contacted by adults unknown to them via **Snapchat** and an online platform called **Omele**.
- There has also been a concern raised about a hack on the game **Roblox**. It appears that players are invited to open a gift which is a camera. This then takes a photo, which is shared with other users.

Our advice will always be to have open and honest conversations with your child about what they are accessing on their mobile or other devices, and assert your parental control over usage and routines to ensure children are not vulnerable.

If you have concerns regarding your child's social media use, please do not hesitate to contact us for advice.
